Batch Economics — Verified Numbers

All analysis uses these exact figures. FBA fee A\$14.48 confirmed (cubiscan). No estimates.

	Batch 1 (current)	Batch 2 (pending order)
Landed cost/unit	A\$30.76	A\$18.66
Net payout/unit	A\$35.48	A\$35.48
Gross profit/unit	A\$4.72	A\$16.82
Break-even ACoS	7.9–9.6%	~28%
Max CPC	A\$0.65	A\$1.90
Stock remaining	~50 units	400 (not ordered)

CRITICAL RULE: Two separate break-even thresholds. Never apply a blended ACoS target across both batches.

Campaign Summary — May 15–23 (9 days)

■ Auto-01 shows **A\$15/day** budget in the Campaign report — brief states A\$10/day. Verify in Seller Central and update brief if changed.

Campaign	Budget	Imp	Clicks	Spend	Utilisation	ACoS	ROAS	Units	Sales
Auto-01	A\$15/day	9,628	86	A\$81.52	60.4%	24.9%	4.01×	6	A\$327.24
Exact-01	A\$20/day	11,691	97	A\$114.78	63.8%	17.5%	5.70×	12	A\$654.48
PT-01	A\$5/day	128	2	A\$2.36	23.6%	—	0×	0	A\$0.00
TOTAL	A\$40/day	21,447	185	A\$198.66	61.1%	20.2%	4.94×	18	A\$981.72

Profitability Reality — 18 PPC Units

	Batch 1 (current)	Batch 2 (future)
18 units × gross profit	18 × A\$4.72 = A\$84.96	18 × A\$16.82 = A\$302.76
Less PPC spend	– A\$198.66	– A\$198.66
Net P&L; this period	– A\$113.70 LOSS	+ A\$104.10 PROFIT
Opportunity cost of B1 vs B2		+ A\$217.80 per 9-day period

The ads are generating real sales and rank signal. The A\$113.70 loss per 9 days is the deliberate cost of rank-building on Batch 1 economics. Every day Batch 2 is delayed costs ~A\$24 in opportunity profit. Place the order.

Exact-01 — Clean Baseline (May 21–23 only)

May 15–20 data DISCARDED. +20% Product Pages adjustment active that period inflated spend and suppressed CVR.

Under-spend alert: Clean period average spend A\$9.18/day vs A\$20 budget = **46% utilisation**. Removing the +20% product pages adj on May 21 cut impressions on 'glass food storage containers' from ~1,000/day → ~440/day. Budget headroom is real — the new Rank campaign fills it correctly.

Keyword	Clicks	Spend	Sales	ACoS	CVR	vs B1 9.6%	vs B2 28%	Verdict
glass food storage containers	13	A\$13.08	A\$163.62	8.0%	23%	✓ INSIDE	✓	SCALE — at B1 ceiling, monitor daily

meal prep container glass	6	A\$7.98	A\$163.62	4.9%	33%	✓ STRONG	✓	SCALE — earmarked for Rank campaign
glass meal prep containers	1	A\$1.48	A\$0	∞	0%	✗	✗	WATCH — cut bid to A\$1.10, pause at 5+ clean clicks / 0 sale
borosilicate glass containers	2	A\$2.71	A\$0	∞	0%	✗	✗	CUT URGENT — bid A\$1.50→A\$0.65 today
meal prep containers glass	1	A\$1.49	A\$0	∞	0%	—	—	TOO EARLY — new KW at A\$1.20, wait 10+ clicks
glass food containers with lids	1	A\$0.80	A\$0	∞	0%	—	—	TOO EARLY — 1 click only

glass food storage containers ACoS trend (clean days): May 21: 3.1% → May 22: 7.8% → May 23: 13.1%. 3-day average 8.0% is inside B1 break-even, but the May 23 single-day breach (13.1%) is a warning. If ACoS exceeds 12% for 2 consecutive clean days, reduce bid 10–15%.

Target	Status	Data	Action
B0F3WV3GWW (Feshory)	ACTIVE — should be removed	10 imp, 1 click, A\$0.97, A\$0	REMOVE immediately — before budget increase
B09YDHRN7H (Igluu)	ACTIVE ✓	2 imp, 1 click, A\$1.39 CPC, A\$0	Keep. Verify bid — CPC A\$1.39 > B1 max A\$0.65

B08SJCJNKN	PENDING — add	Auto: 1 click, A\$0.92, 1.7% ACoS	Add at A\$0.75 (not A\$0.85) — above B1 max CPC

Bid challenge on B0D9D25791 and B08SJCJNKN: Both converted in Auto at A\$0.73 and A\$0.92 CPC respectively, producing 1.3–1.7% ACoS. Pending list suggests A\$0.85. Since PT CPCs tend to match the set bid closely on fixed-bid campaigns, A\$0.85 is 31% above B1 max CPC of A\$0.65. Recommend starting at **A\$0.75** and reviewing after 5 clicks. If ACoS stays under 9.6%, raise to

A\$0.85.
